

Keypassword

About this app

The name of this app is Keypassword. This app is a professional application to generate complex and great passwords in a easy way. It runs locally on your computer with no cloud features and all data stays on your computer. It is regularly updated and improved to make it faster and more reliable for you. This app is completely free of charge.

The Privacy Policy

This Privacy Policy applies only to this app (Keypassword). This app is officially hosted and can be downloaded only from Mac App Store (for macOS) and App Store (for iOS). The sections below outline in greater detail how Keypassword works and aim to explain what kind of information is collected.

Information collection

Keypassword does not read, collect and / or store any kind of information from or related to your device, operating system, hardware and / or network configuration, attached or paired devices and / or active users and / or accounts.

Third party websites and web stores, tracking and data usage

This app cannot be linked and / or hosted without my express consent to third party websites and / or web stores. A third party website and / or web store may use cookies, tracking technologies or third-party tools to monitor your activity and collect your personal information in accordance with their own privacy policies. This Privacy Policy does not apply to third party websites and / or web stores.

Changes to this Privacy Policy

Please keep in mind that I reserve the right to change, modify and / or update this Privacy Policy from time to time, without any prior user consent and / or approval. I will notify the users of any changes of the new Privacy Policy by posting here the new Privacy Policy and I advise you to review this Privacy Policy. Changes to this Privacy Policy are effective when they are posted here. If you do not agree with this Privacy Policy, then you should delete and / or not use this app.
